Morningstar Charge Controllers

Benefits of using these high quality products

- The Best Overall Value – Combination of performance, features and competitive price results in the best controller and inverter value on the market.
- Extremely High Reliability – Failure rates of less than 1 per 1,000 units shipped.
- Outstanding Battery Charging – PWM charging can double the life of the battery and recover capacity in a sulfated battery. Series design (not shunt) reduces heating and stress on the electronic components.
- ELECTRONIC PROTECTIONS – Fully protected against reverse polarity, short circuit, over current, high temperature and reverse current at night. No mechanical fuses.

The range of products includes the following:

Morningstar Solar Charge Controllers

TriStar – 45 & 60 amps at 12-48 volts

ProStar – 15 & 30 amps at 12/24 or 48 volts
