Industrial Blade, Machine Knife and Hand Knife Manufacturers

Company Profile

Durham-Duplex is a world leader in the design, manufacture and distribution of machine knives and industrial razor blades. As a family owned manufacturing company based in Sheffield, England since 1910, **Durham-Duplex** is very proud of its "Made in Sheffield" pedigree and now sells to over 40 countries direct and through our dedicated international distributors. Thus a century after the first blade was sold Durham Duplex's quality products are still sought after global commodities and the company is looking forward to the next 100 years of innovation and excellence.

Quality

Durham-Duplex has a time proven quality assurance program with an experienced inspection team at each facility. This is supported by our own ISO based "in line" quality assurance regime that ensures that all knives are continually checked in production to ensure the highest standards of quality and accuracy.

Service Ethos

Durham-Duplex values its customers and has a large and experienced staff to ensure personal and efficient service.

Razor Sharp since 1910

Machine Knives

Durham-Duplex provides a comprehensive stock of punches, straights, circular and serrated machine knives, manufactured from carbon, stainless, alloy, high speed and powder steels to fulfil the modern factories requirements in almost every industrial sector. Furthermore, our extensive technical experience is always available to assist in custom knife design, upgrading and problem solving.

Vertical Packaging Knives

We stock a extensive range of precision ground serrated knives in parallel, tapered and apex profiles available with standard, tear notch or easy open tooth configurations to complement all modern packaging equipment.

Horizontal Packaging Knives

Flow wrap, shrink pack and over wrap knives in toothed, scissor, straight, and zig-zag profiles with progressive or tear notch options. We also carry an extensive range of stock parts for rapid delivery.

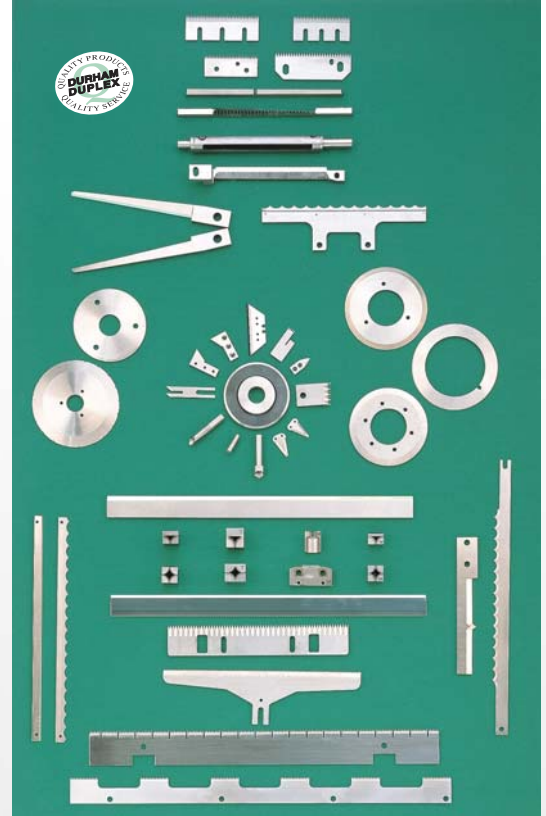

Machine Knives

Food Processing

The demands of the food industry requires an extra special touch. Whether processing or packaging food products customers require a blade with clean, corrosion resistant edges and traceability. To meet this industry standard **Durham-Duplex** offers the highest grade magnetic stainless and high chrome tool steels across the majority of our knife range.

Food Packaging

Fibre Processing, Plastic Film & Paper Converting

Converting man made film and fibre products requires an array of cutting requirements to effectively slit, perforate, chop and recycle the end product. **Durham-Duplex**'s innovative and unique range of industrial razor blades are used by the world's largest manufactures to ensure the consistency and quality of their products. Additionally our investment in innovation means that we are always at the fore-front of technology when it comes to preparing machine knives for processing the material into bags, sacks, tape, labels and sachets.

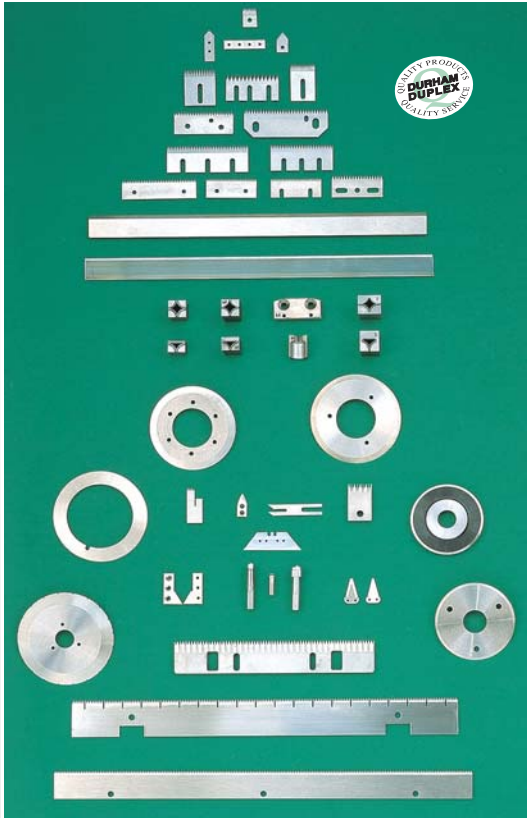

Polythene & Paper Bag & Sack Production

Machine Knives

Vacuum Packaging & Case Taping

Printing & Graphics

Durham-Duplex has a wide range of knives for use in the print and sealing areas. These include high precision vacuum punches, fly knives, serrated web press knives, film cut off knives, core cutters, crush cutters, dish slitters, tape sealers and bottom knives.

Specialised Manufacture of Unique Machine Knives

Durham-Duplex's bespoke manufacturing facilities enable the company to develop prototypes and competitive short run products for machine builders, end users and multinationals alike. Investment in modern manufacturing equipment means that production runs of up to one million blades can be delivered on time and correct to specifications.

Straights, zig zags, flat circles, punches, coiled strip, dish circulars, serrated strip, granulators, pelletisers, tube cutters, serrated pieces are all available so if it cuts, slits, slices, pierces, perforates, chops, chips, dices, scrapes, mixes, folds, macerates or creases then we can probably help you improve it.

Safety Knives and Hand Knives

The Durham-Duplex range of hand held utility knives are designed for today's environment. Strong, durable, uncomplicated and effective whilst remaining easy on the pocket. Where safety is an issue we have a multitude of different approaches from spring loaded designs to hidden blades and restricted apertures to ensure that every job can be completed quickly and safely without damage to product or person.

"Safety Knife" 2a, 2b, 9 und 14, sowie "Carton opening knife" 2 und 4.

Industrial Blades

Durham-Duplex's "Made in Sheffield" credentials confirm it as one of the world's best industrial razor blade manufacturers. By making precision ground strip to the most exacting tolerances the company's products are able to cope with the demands of modern production methods and all trade requirements. We offer an extensive standard blade range in carbon, stainless and high grade alloys, complemented by the latest in long life, low friction PVD coatings, powder technology carbide and ceramic blades. In addition, our utility range can be supplied *branded* with your company name and logo, on the body, the blade or the packaging and is offered in a selection of presentation, utilitarian and safety packaging.
